PROFILE SUMMARY

Data Analyst with 3+ years of experience transforming business data into actionable insights using SQL, Power BI, Metabase, Excel, and BI reporting tools. Experienced in building KPI dashboards, optimizing SQL queries, analyzing business performance, and collaborating with product and engineering teams to support data-driven decision making. Strong background in ERP systems, SaaS products, and product analytics with experience across data operations and business intelligence.

EXPERIENCE

NITEX

Data Analyst

Oct 2024 - Feb 2026

- Analyzed business datasets containing thousands of production and costing records to identify operational trends and improve reporting accuracy.
- Built interactive KPI dashboards in Metabase and Power BI used by management to monitor production performance, GMV, order status, costing, and operational metrics.
- Worked closely with Product Managers, Engineers, Operations, and Business teams to define reporting requirements and translate business problems into analytical solutions.
- Developed 500+ SQL queries for operational reporting, KPI tracking, dashboard automation, and business performance analysis.
- Redesigned workflow for Costing, Sample Management, and Project Management modules, reducing operational processing time by nearly 3x.

NITEX

Data Operation Associate

Sept 2023 - Sept 2024

- Designed and maintained dashboards, tracking key performance indicators (KPIs) and generating comprehensive reports.
- Managed end-to-end data operations, ensuring data accuracy, consistency, and availability for strategic initiatives.
- Developed expertise in data visualization and reporting, enhancing the accessibility of actionable insights.

BASIS

Content Creator

Jan 2023 - May 2023

- Drafting email and SMS content for stakeholders
- Creating banner content for print and digital use
- Developing content for various communications as requested
- Serving as the primary contact for all content-related tasks

EDUCATION

Bachelor of Science in Information Technology (BSc in IT)

University of information technology & sciences

2018 - 2022 | Dhaka, Bangladesh

SKILLS

- Data Analysis
- Business Intelligence
- Dashboard Development
- Data Visualization
- KPI & Performance Reporting
